

INFECTION PREVENTION

Always Pre-Clean Surfaces Before Disinfecting

Cleaning (Removes germs) and Disinfecting (Kills germs) are imperative. Infection prevention means you must both clean and disinfect.

Respect Dwell Time

A standard dwell time in the industry is 10 minutes. Carefully read the instructions listed on the disinfectant.

Use Microfiber When Possible

On many surfaces, 30% of microorganisms can be removed by wiping with a wet cloth; but if you use microfiber, this number can increase as high as 99%

Know Your Gray Zones

Gray zone items are the objects that everyone thinks somebody else is cleaning and disinfecting, e.g. ice machine, door handles, coffee maker. etc.
